DETAILED ACTION

Drawings

1. The drawings were received on 8/2/2007. These drawings are acceptable.

Allowable Subject Matter

2. Claims 10-20 are allowed.

Applicant has modified the application in order to alleviate the objections as noted in the first office action on the merits.

The following is a statement of reasons for the indication of allowable subject matter for claims 10-20: In the claims as claimed, the prior art fails to show or fairly suggest a method for determining a rotor position of a synchronous motor wherein an amount of current vector necessary to attain a defined deflection of the rotor is determined. Methods of determining angular position of the rotor in a synchronous motor are well known in the art, however, determining the deflection of the rotor in the method as claimed is novel and nonobvious.

In addition, the International Preliminary Examination Report cites a document that it considers to be most relevant to the disclosure of the instant application. The title of the document is "A Procedure to Estimate the Absolute Position of the Rotor Flux of a Permanent Magnet Synchronous Machine" from the European Conference on Power Electronics & Applications, 1991, Backhaus; Reinold; Kalker. After reviewing this document, it is not considered to be defeating prior art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Brandt whose telephone number is (571) 270-1745. The examiner can normally be reached on Monday through Thursday 7:30a.m. - 6:00p.m. EST.
